1. Prepare materials as indicated in the Materials/Cutting Chart above.

- Heat-N-Bond Lite
- Back Fabric
- Front Fabric
- Puffy Foam
- Front design applique fabric
- Heat-N-Bond Lite

2. Fuse the Heat-N-Bond Lite pieces to the backs of the three fabric pieces. You should now have four pieces ready to use.

3. Transfer design to embroidery machine.
4. Hoop water-soluble stabilizer in a 5 x 7 inch hoop and attach to embroidery machine.

5. Sew #1 and #2 in the Color Sequence Chart. These stitches will create the hanger and placement stitches for the project.

6. Remove hoop from machine and place the Puffy Foam piece over the placement stitches. Secure with tape at top and bottom.

7. Return hoop to machine and sew #3 in the Color Sequence Chart. These stitches will attach the foam to the stabilizer.

8. Remove hoop from machine and carefully cut away excess foam from around the project.

9. Remove paper backing from the front fabric.

10. Place the front fabric piece, right-side-up, over the foam and secure with tape at top and bottom.

11. Return hoop to machine and sew #4 in the Color Sequence Chart. These stitches will attach the front, fabric piece to the project. (It is difficult to see in the photo because I used white thread to match the fabric background.)

12. Sew #5 in the Color Sequence Chart. These stitches will create the placement stitches for the **front design**.

13. Remove the paper backing from the applique fabric.
14. Remove hoop from machine and place the applique fabric for the design over the placement stitches (right-side-up).
15. Secure with tape at top and bottom, keep tape out of stitching line.

16. Return hoop to machine and sew #6 in the Color Sequence Chart. These stitches will attach the fabric piece to the project.
17. Remove hoop from machine and carefully cut away excess fabric from around the center design.

18. Return hoop to machine and sew #7 and #8 in the Color Sequence Chart. #7 will create the satin border around the stocking and #8 will create the two snowflakes.

19. Remove the paper backing from the back, fabric piece.

20. Remove hoop from machine and turn up-side-down on a flat surface.
21. Place the back, fabric piece over the back of the project and tape in place-top and bottom.
22. Return hoop to machine and sew #9 in the Color Sequence Chart. These stitches will attach the back, fabric piece to the project.
23. Remove hoop from machine and carefully cut away excess back fabric from around the project.

24. Turn hoop to right side and carefully cut away excess fabric from the front of the hoop.

25. Return hoop to machine and sew #10 in the Color Sequence Chart. These stitches will create the satin border and top stitching around the outside of the project.

(If you want to sew the project as an ornament, stop here and your project is ready to remove from the hoop.)

26. Sew #11 in the Color Sequence Chart. These stitches will create the **buttonholes** for the candy cane.

27. Remove hoop from machine and project from hoop.
28. Remove the stabilizer, except for ¼ inch, from around the project. Leaving ¼ inch stabilizer will prevent satin borders from being accidentally cut.

29. Remove the remaining ¼ inch stabilizer from around the project using a wet paper towel or Q-Tip.

30. Let edges dry and your project is complete.

The other five designs in this set are sewn in the same way. They differ only in the front design. I have included Color Sequence Charts for the remaining designs in this set for your reference. Notice in the Color Sequence Charts the first four steps and the last three or four steps are identical in each design.
