

Instructions for

Fsl Door Hangers

These free-standing lace door hangers will fit in a 5 x 7 embroidery hoop.

Using two layers of water solvent stabilizer, pick your design of choice and stitch out.

Once done, rinse the stabilizer out and lay flat to dry.

Now it is ready to hang on your door.

The one design that has a clock face on it with dial hands; you will need a ½ inch paper fastener to attach the dial hands to the clock front.

If the holes of the dial hands are too small, just use a large head darning needle to gently press and open the holes on the larger end. An example for the door hanger clock is showed below.

Happy stitching.
