

MINI FSL CHARMS/EARRINGS/PENDANTS

For all the designs basic method would be same-

1. Hoop 2 layers of wash away stabilizer, the fibrous type is best. I recommend Vilene. (Make sure its hooped drum tight)
2. Try and use the smallest hoop which can accommodate the pieces you wish to embroider.
3. As with all free standing lace, you need to use the same thread in the bobbin as the top thread.

(So you will keep changing the bobbins when you use multiple colors in a design, however for very little details you may skip it)

4. Polyester thread works best for FSL.
5. Slow down the speed if your thread breaks.
6. Make sure the thread tension is perfectly set and you have a nice fresh needle.
7. Once you complete the pieces, remove and unhoop. Trim away all the excess stabilizer and then rinse the pieces under running water till all the stickiness is cleared.
8. Lay them on a paper towel and dry them flat.
9. Decorate using beads, pearls. Rhinestones or whatever you desire.
10. Use them as earrings, pendants, key chains, zipper pulls, tags, and ornaments for decoration!
