

Love Candle Wraps FSL

Hoop 2 layers of a woven wet and gone stabilizer. Pick your thread colors and have fun creating.

There is multiple color changes included with all the designs so that you can have just about any look your Heart desires. You can choose to stitch the eyelets or not stitch them. You can stitch the eyelets on only one side of the candle wrap so that you can stitch them together with your sewing machine. You can lace them at all edges if that is what you choose to do. They were fun to design and fun to get stitched out and they make great gifts as well as putting them around your own home to remind you of the all the reasons you love.

I prefer to use them as wraps around a candle container but you can also use them to wrap directly onto a tall candle after heat the side so that they will embed into the wax of the candle.
