

Rag Edge Shapes

Materials needed:

Applique Material large enough to cover the shape of the design and leave at least 1/2"

A piece of batting the same size as the Applique Material.

Step 1: Stitch Color # 1.

Please note that color changes are for those that do not have the STOP command. All Steps can be stitched in the same color.

Step 2: Place the "sandwich" of Batting and Fabric over the design area.

Glue or tape in place.

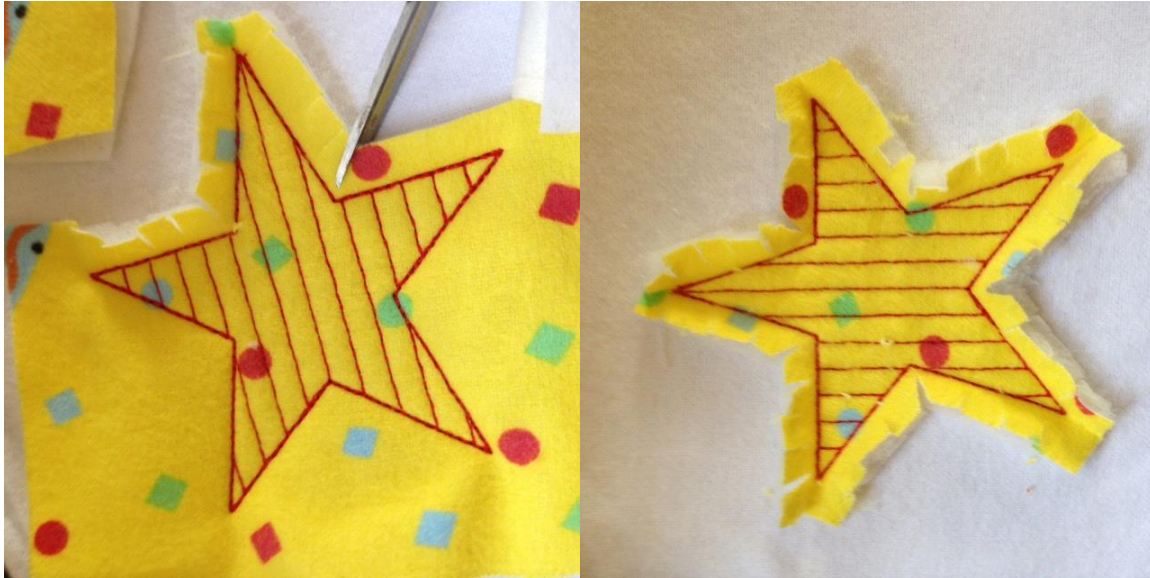

Step 3: Stitch the design.

Finishing:

You can cut around the design area as shown and then clip the material toward the design. This will give you a fluffy rag edge after washing. The more it is washed the softer it will get.

Applique option:

Clip close to the edge or use a decorative scissor to carefully cut around.

Or You can just stitch it out with out the fabric. To do this, just skip the 1st color.
