

Guidelines for machine embroidery set of designs "Flowers" with 3D elements

To get a good result, the fabric should be well stabilized and fixed in the hoops.

1. Embroider individual petals on the organza (File IB293-14). Use the bottom thread of the same color as the top one. For better results, you can use a water-soluble stabilizer with organza.

2. Cut the petals close to the contour line. Wash water-soluble stabilizer out.

3. Embroider the first 10 colors of the file IB293-11 on the garment or the fabric.

4. Put the petals embroidered on organza in the middles of the flowers one by one and embroider fixing stitches and middles of the flowers.

5. Embroider the small branches from the set the same way.

You can also sew 3D petals by hand, decorating them with beads or rhinestones, or do not use 3D elements (then you need to skip the fixing lines and embroider only the middle of the flowers).

Enjoy the result!
