

Guidelines for embroidery Christmas ball with cross stitch and applique

The first color in the design shows the location of the ball background applique.

Then you can use the first color again, putting the fabric on the specified place for applique and fixing it with glue spray. Or just embroider the second color, the zigzag, after which cut the fabric close to the zigzag line.

3-12 colors - embroidery design

13-14 colors in the design – applique of transparent vinyl (don't use too dense vinyl; vinyl of correct density is used for stationery folders).
Try to cut the vinyl close to the zigzag line.
You can also skip these steps and may not use vinyl.

15-16 colors in design – Applique of the bow

17-18 colors- the final decorative bordering with satin
