

Embroider the tail and fins of the fish on the organza. Use the lower thread of the same color as the upper thread. To get a good result, you can use a water-soluble stabilizer together with organza.

Cut the tail and fins close to the contour line

Embroider the first color of the fish body

Put the fins and tail on the indicated places, and embroider the second color

Embroider the third color, which will show the location of the application

Place the tissue for applique. You can also use a sintepon under the cloth to obtain a volumetric result

Embroider the zig-zag, after which trim the remaining tissue

Embroider the remaining decorative stitches
