

Instructions for embroidery and assembly of a decorative ball

1. Fix the tear-off stabilizer into the hoop, fix the fabric on top with spray glue and embroider the pattern.

2. Take out the embroidery from the hoop, cut off the excess stabilizer and cut out the pattern along the outer line of the contour stitch.

3. Sew the ball along the inner lines of the contour stitch, alternately the upper and lower parts (on a sewing machine or by hand). Leave a hole for packing the ball. Remember to secure a ribbon or a string to hang the ball at. Fill the ball with filler. Sew up the hole.

The ball is ready!
