Guidelines for machine embroidery design "Mulatto"

This design is for embroidery on dense fabrics. Be sure to stabilize the fabric well.

The first color in the design is the backing for the headdress. Embroider this color to match the fabric on which you embroider this design.

Consider the selection of threads for the face carefully. Try to use threads as similar in tone as possible to the color scheme of the design.

You can experiment with the colors of the girl's headdress and embroider it with the colors you like.

Happy embroidering!
