

Guidelines for the Mouse made of felt embroidery

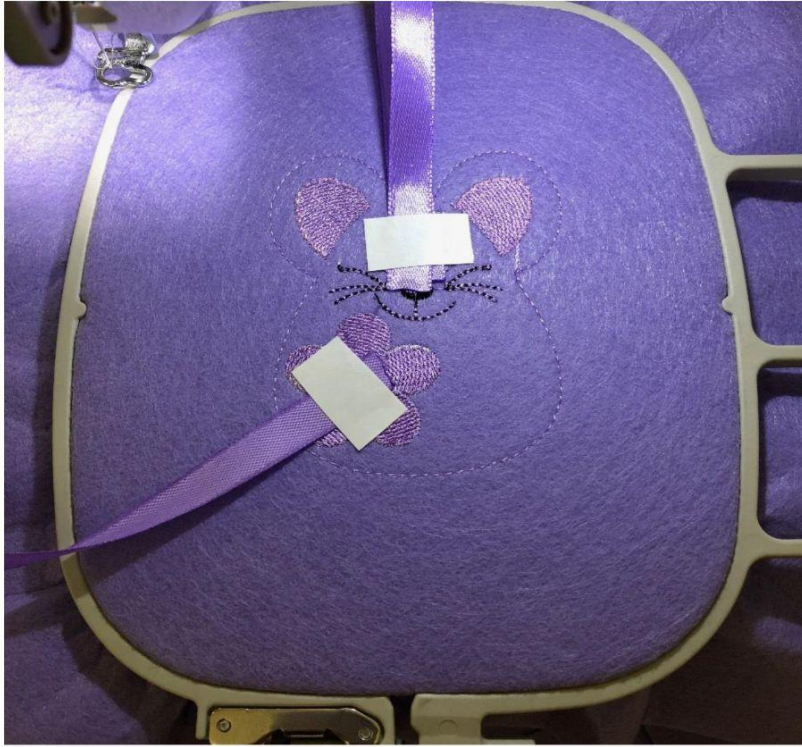

1. Put felt into the Hoop

2. Embroider all colors in the design except the last one

3. Fix the ribbons for the tail and holder with sellotape on the back of the Hoop

4. Fix the bottom layer of felt with glue-spray

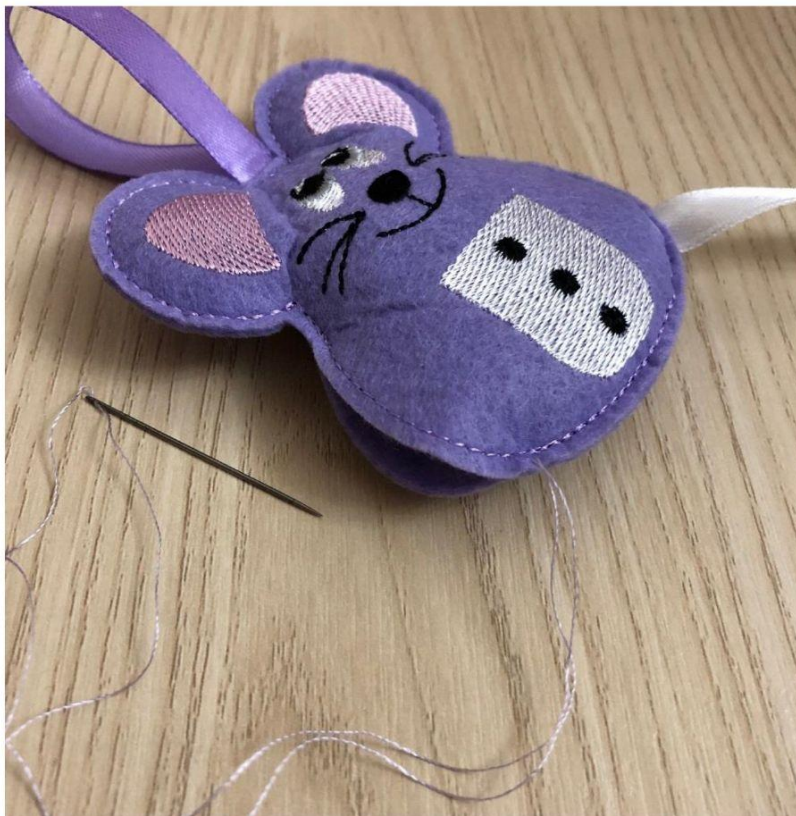

5. Flip the embroidery Hoop and embroider the last color which will sew the two layers of felt together

6. Take the embroidery from the Hoop. Cut the toy along contour lines, retreating 2 mm from the stitch.

You need to cut very carefully separately the upper and the lower layers of felt in places where the ribbons are sewn, so as not to damage the ribbons.

7. Stuff toy with polyester wadding through the remaining hole.

8. Sew the hole by hand

The toy is ready!
