

How to use

1. All six pairs of wings of a fireflies embroider on a organza.

Put a water soluble stabilizer in the hoop. Secure organza on top (temporary fix adhesive can be used to secure organza)

2. Cut the wings of the fireflies. The wings must be cut out together: two wings make up one piece!

3. Wash all the wings and remove the water soluble stabilizer. Dry the wings of fireflies.

4. Embroider the first 5 colors of a fireflies jar design.

5. Alternately attach to the place location of the wings, two pairs of wings, embroider a sixth color that connects the wings with the body of the firefly. Stop embroidery before attaching wings to the next firefly.

Admire the embroidery!
