

Lama Soft Toy

Required materials: you can use any fabric, but take into account that this is for the child, so it is better to have natural ones. Pre-recommended to glue the fabric interlining, to preserve the shape after washing, but you can skip this point. You will also need a tear-off stabilizer in the hoop, embroidery thread, temporary fix glue or double-sided tape.

1. Preparation of materials for work.

First, embroidered legs and ears, if the hoops allow, these details can be embroidered together.

2. Fasten the tear-off stabilizer in the embroidery frame and sew the contour of the details of the ears and tabs

3. We put the fabric corresponding to these parts. Fabric in two layers, folded front side inward.

4. Make the following stitch, which will stitch both parts together.

5. We take out the embroidery from the hoop, remove the excess stabilizer, and also cut off the excess fabric, stepping back from the contour 0.5cm

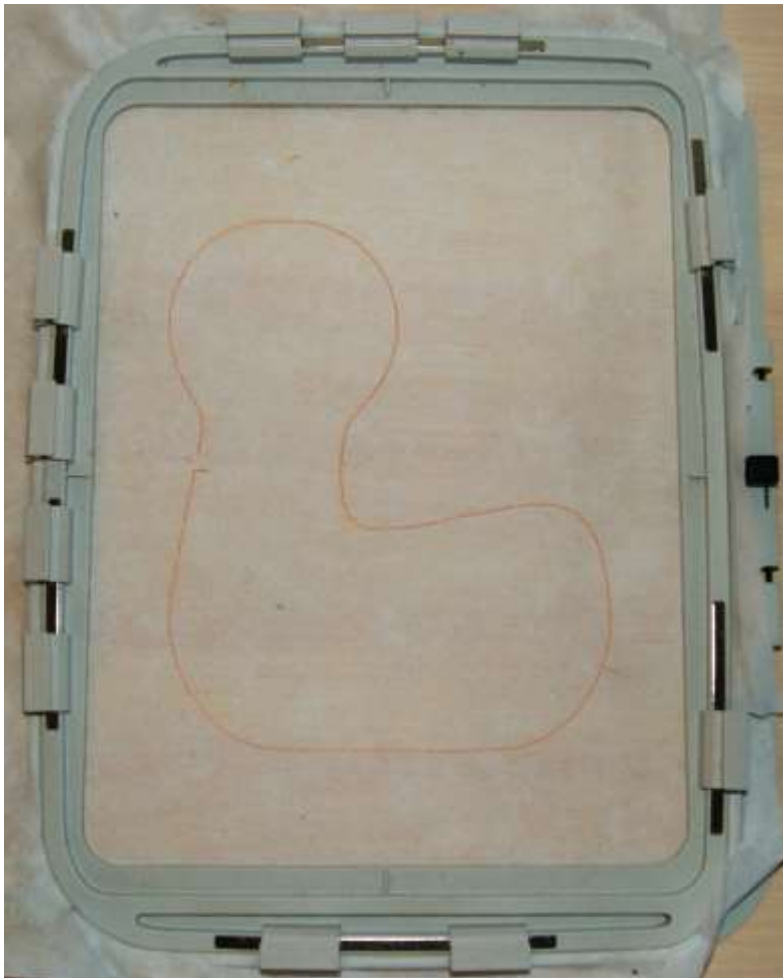

6. Turning out parts on the front side.

7. Paws are not firmly filled with holofiber or other filling.

8. Fasten the tear-off stabilizer in the hoop and sew the contour of the toy's body

9. Put the fabric face up, you can pre-spray the glue with temporary fixation on the stabilizer.

10. Embroider the contour of the body, securing the fabric to the stabilizer, as well as immediately sew the contour of the muzzle and decoration of the body.

11. Put material, for muzzle, decoration of the body.

12. Embroider zig-zag stitches.

13. Remove excess material

14. Sequentially embroidery the finishing contours of parts.

15. Embroider eyes and spout.

16. Put paws and ears, and fix them with double-sided tape

17. From above we put the second layer of fabric for the body (the back side of the toy), face down

18. Embroider a line holding both layers of fabric together.

19. We take out the embroidery from the hoop, remove the excess stabilizer, and also cut off the excess fabric, stepping back from the contour 0.5cm

20. We turn out parts of the toy on the front side, and iron

If you plan to leave the toy in the form of a comforter, then at this stage sew a non-sewn piece of fabric. If a voluminous toy is planned, then fill the body of the toy with a holofiber or other filler, finally sew up an unstitched piece of fabric through which the stuffing was carried out.

We admire the finished toy!)
