1. Prepare materials indicated in the Materials/Cutting Chart on page 1.

Felt-Backed, Tablecloth Vinyl

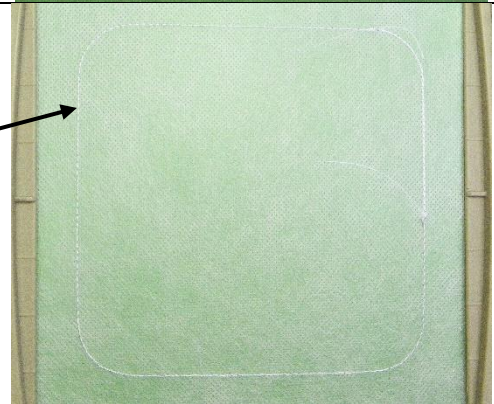

Puffy Foam

Heat-N-Bond-Lite

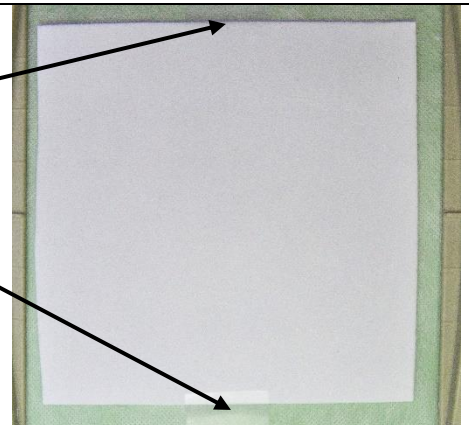

Front Fabric

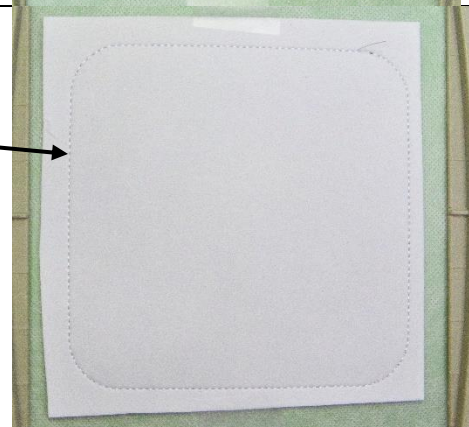

2. Hoop the water-soluble stabilizer in a 5x7 inch embroidery hoop and attach to machine.
3. Transfer design (NLSEE2323-5x7) to embroidery machine.
4. Change needle and bobbin thread to white and sew #1 in the Color Sequence Chart. These stitches will create the "placement stitches" for the project.

5. Remove hoop from machine, place on a flat surface and place the Puffy Foam piece over the placement stitches.
6. Secure with tape at top and bottom.

7. Return hoop to machine and sew #2 in the Color Sequence Chart. These stitches will attach the Puffy Foam to the stabilizer.

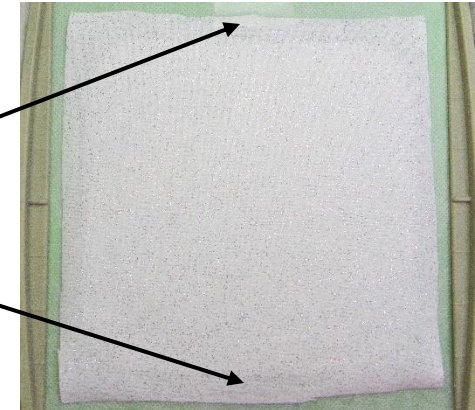

8. Remove hoop from machine, place on a flat surface and carefully cut away excess foam from around the outside of the stitches.

9. Using a hot iron, press the Heat-N-Bond Lite to the back of the front, fabric piece.

10. When cool enough to touch, remove the paper backing from the fabric and place the fabric over the foam piece.

11. Secure with tape at top and bottom.

12. Return hoop to machine and sew #3 in the Color Sequence Chart. These stitches will attach the front fabric to the project.

13. Change needle thread to green; bobbin can still be white.

14. Sew #4 in the Color Sequence Chart. These stitches will create the green part of the front design.

15. Change needle thread to gold and sew #5 in the Color Sequence Chart. These stitches will create the remainder of text of the design.

16. Change needle thread to red and sew #6 in the Color Sequence Chart. These stitches will create the heart.

17. Remove hoop from machine, place hoop face down on flat surface (back of hoop facing upward) and trim all thread tails.

18. Place the Felt-Backed, vinyl, tablecloth piece over the back of the hoop-line it up with the front fabric piece.

19. Secure with tape in all four corners.

- 20. Return hoop to machine.
- 21. Change needle thread to white and sew #7 in the Color Sequence Chart. These stitches will attach the vinyl backing to the project.

- 22. Remove hoop from machine, place up-side-down on a flat surface and using sharp scissors, carefully cut away excess vinyl from around the outside of the stitches.

- 23. Turn hoop over (right side up) and using sharp scissors, carefully cut away excess front fabric from around the outside of the stitches.

- 24. Return hoop to machine and sew #8 in the Color Sequence Chart. These stitches will create the satin border around the project.

Back

25. Change both needle and bobbin thread to gold and sew #9 in the Color Sequence Chart. These stitches will create a motif on top of the satin border.

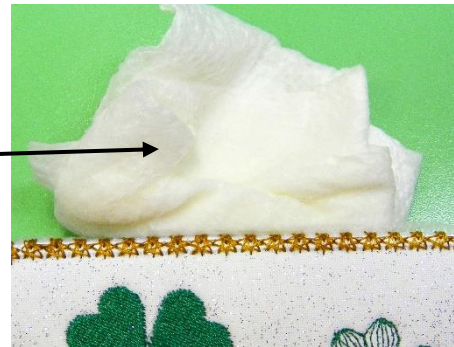

26. Remove hoop from machine and project from hoop.

27. Cut away most of stabilizer from around the project. Leave about ¼ inch to ensure border stitches are not cut accidentally.

28. Remove the remaining ¼ inch of stabilizer using a wet, paper, towel.
