

Decoration FSL should be embroidered on two layers of a water-soluble stabilizer.

If your water-soluble stabilizer has a high density, then you can embroider on one layer.

After the products are embroidered, the water-soluble stabilizer should be washed.

If it is a brooch or other product that must be tough and keep in shape, do not wash away the highly water-soluble stabilizer.

The product must then be dried. Sometimes you can use an iron, you need to put under the product and top a terry towel and iron it.

Then, according to your taste, the product can be decorated with beads, sequins, paillettes. And add hardware.

The design of these earrings is provided in two versions:

1. With a loop to hang the bead in the center of the earring
2. Without loop

Also you can use one or two colors for embroidery of this product
