

Design poppies FSL - you can create earrings, a ring and other jewelry to your taste.

Embroider the poppy FSL design on a dense water-soluble stabilizer. If your stabilizer is not dense enough, use two layers. Stabilizer should be well locked in the hoop.

1. Embroider the design, use the lower thread of the same color as the upper one.
2. Wash water soluble stabilizer
3. Next, the parts need to be dried.
4. Sew two parts of the flower, the middle of the flower can be decorated with beads or rhinestones to your taste.
5. If you need to attach fittings, make a hole in the right place with an awl or a thick needle
