

## Guidelines for embroidering design «Roses FSL»

You can create earrings, ring and other jewelry to your liking using design Roses FSL.

Embroider Roses FSL design on a dense water-soluble stabilizer. Use two layers if your stabilizer is not dense enough. The stabilizer should be well fixed in the Hoop.

1. Embroider the design; use the bottom thread of the same color as the top one.

2. Wash the water-soluble stabilizer.
3. The parts need to be dried. If you want to speed up this process, you can use a hair dryer.
4. Sew three parts of the flower in the center. The middle of the flower can be decorated with beads or rhinestones if you wish.
5. If you need to fasten furniture to create jewelry, make a hole in the right place with an awl or a thick needle. Try not to break the threads, but simply push them apart. Thread the connector (ring) for furniture into the hole and then attach the desired furniture.

Enjoy the beautiful jewelry!
