

FSL HEART ALPHABET CHARMS

1. Hoop 2 layers of water soluble stabilizer and adjust the pieces as they fit.
2. Mesh type stabilizer is best like Vilene and polyester thread is recommended!
3. As with all free standing lace, fill the bobbin with the same top thread.
4. Slow down your machine for trouble free sewing.
5. Make sure the thread tension is perfect for a good finish to your lace.
6. Once done, trim the excess stabilizer and rinse under running water.
7. Rinse just enough to rinse away the stabilizer but don't overdo it if you need the stiffness.
8. Let the pieces dry flat and when almost dry, cover with a pressing cloth and iron to give a neat finish.
9. If desired add rhinestones, sequins or any other decorations.

10. May be used as to make keychains, necklace, bracelets, wine glass markers, gift tags etc...
