The back of the plush: 16.5cm x 21cm high

Arms: 2 pieces of 12.5cm x 8.5cm de high

Tear-off support

Water soluble support

Stuffing, string, and a long sewing needle

Before you begin, print the .PDF to follow the steps

THE EARS

- Stop 1: normally this seam is done on your support to indicate where to put your fabric
- Stop 2: this is done on your fabric; this seam will join your fabric with your support
- Stop 3: put your piece of fabric that will be the inside of the ears, right sides together on the ears part, this seam will sew your 2 pieces together
- Once your ears and arms are finished, take the ears, put à drop of glue in the center and bend your ear to give a shape to your ears

THE ARMS

- Stop 4: sewing on your support to show you where to put your fabric, put your fabric on this seam, take care to cover the seam
- Stop 5: sewing that will sew your fabric on your support

Take out the frame, remove the excess fabric, leave a little more in the unsewn portion to help you make your invisible seam

For the invisible seam, see the method on YouTube: turn right side out, put stuffing and make a hand seam (invisible seam)

Putting aside for later

THE LOWER BODY

- Stop 1: This is done on your support to show you where to put your piece of fabric
- Stop 2: put your first piece of fabric before sewing this seam will sew your fabric on the support
- Stop 3: sewing the center of the belly to show you where to put your piece of fabric (beige)
- Stop 4: sewing your fabric piece on your main fabric
- Stop 5: bourdon stitch on the belly piece and stitch all around the head to indicate the size of the head

THE HEAD

- Stop 6: sewing on your support to show you where to put your fabric in the top of the fac
- Stop 7: sew the fabric on the top of the face on your support, remove the excess fabric in the bottom of the top of the face, put your fabric for the bottom of the face before moving to the next step
- Stop 8: sewing the fabric in the bottom of the face, remove the excess in the top of the bottom of the fac
- **Put on your water-soluble backing before proceeding to the next step**
- Stop 9 to 14: embroidery, remove your water-soluble support
- Stop 15: seam to show where top put your ears, take your ear, and fold it a little before putting it on this seam
- Stop 16: sewing of your right ear

- Stop 17: sewing your left ear
- After stop 17, take your piece of fabric for the back of the plush, put it right sides together, making sure to keep the ears and antlers on the inside
- Stop 18: assembly of the back with the front of the plush

Take out the frame, cut the excess fabric except on the open part. Put the stuffing inside, sew the small opening that remains by hand with an invisible seam as for the arms and go to the assembly

ASSEMBLY

all that is left to do is to assemble the arms on your plush, I work with a small string and a large needle

Take your needle with the string, stitch from the back of the arm to the front of the arm

With your needle, go through the body of your plush to put the other arm (right) for the right arm prick from the front to the back of the arm, then go through the body of your plush to join the 2 ends of string.

Once together, I tie 3 knots, cut off the excess rope and use glue to glue the knot properly.

YOUR LITTLE PLUSHIE IS FINISHED
