Sewing 8-9: Embroidery stitches

ASSEMBLING

You should have this before you start gluing, to help you, you can do a mounting without the glue before sticking to the hot glue gun

Start by sticking the man's head on the scarf

Stick the hat on the head and along the body

In the pom-pom, make an incision close to a bumblebee spot

Insert the bottom of the hat into the pom-pom

Come stick the snowman on the body of the Reindeer, make coincide the arm of the man, the body of the snowman goes to the back of the body of the reindeer but the head goes on the front of the body of the reindeer

Stick the head on the front of the Reindeer's body and on the front of the snowman's head

Stick the nose of the snowman

Stick the right wood (facing you) on the back of the head and ears.

Glue the wood with the berries on the front of the head

Grab your tie with your ribbon to hang your work

If you resize or modify this design in any way, I cannot guarantee a quality point.
