

## This step list is the basic guide for a snap tab

1. Snap tab placement
2. PLACE FABRIC ( PU Leather/Felt etc) TO COVER PLACEMENT OUTLINE
3. Detailing within design
4. RUN ANY PERSONALIZATION (if any)
5. PIN OR HOLD BACKING FABRIC (right side down)
6. Finishing stitch
7. Install snaps and enjoy!

\*\* Finishing stitch is run to "seal" your project - to cover the "ugly" stitches on the back of your design with the backing fabric to give you a beautiful, finished project.

HAPPY STITCHING....

thank  
you
