

ITH EMBROIDERED KEYCHAIN

Hi! My name is Hanna. And I'm glad to present you instructions for ITH embroidered keychain.

These designs are suitable for 4x4 and 5x7 Hoops. Materials that do not crumble are suitable for making this design. I use: felt, leather substitute and suede substitute.

This product is easy to use, so it is easily suitable for beginners.

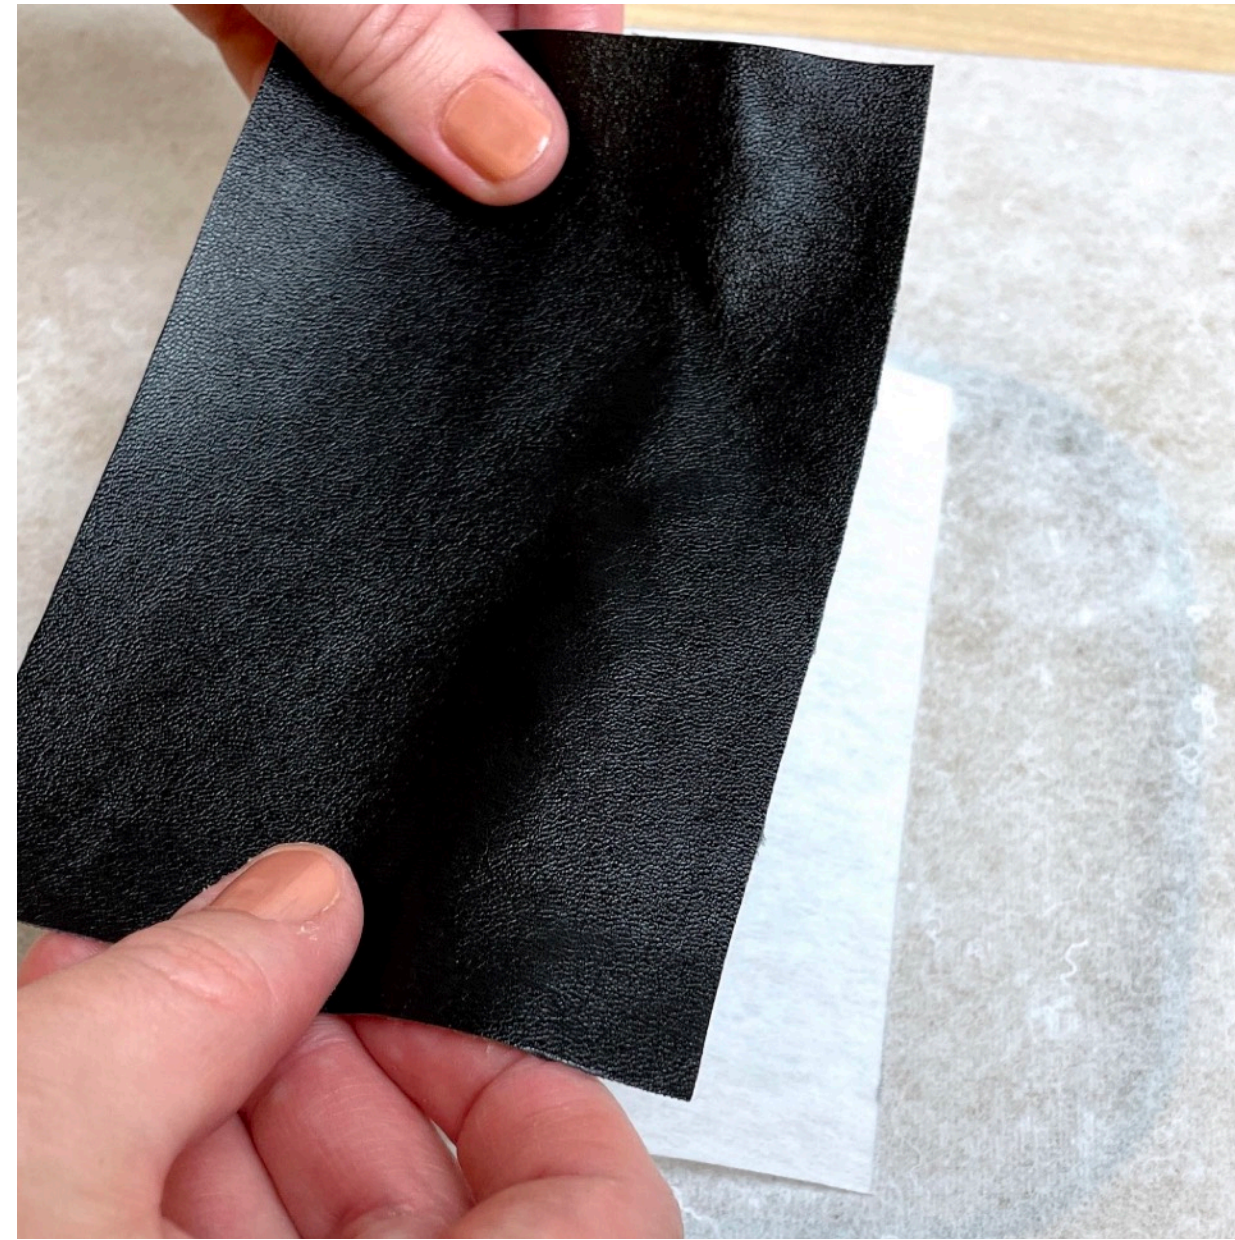

TO GET STARTED YOU NEED:

1. Cuts of leather - 2 pcs
2. Sealing stabilizer -1 pc
3. Pins or a special spray (I use pins)
4. Hoops, 4 inches

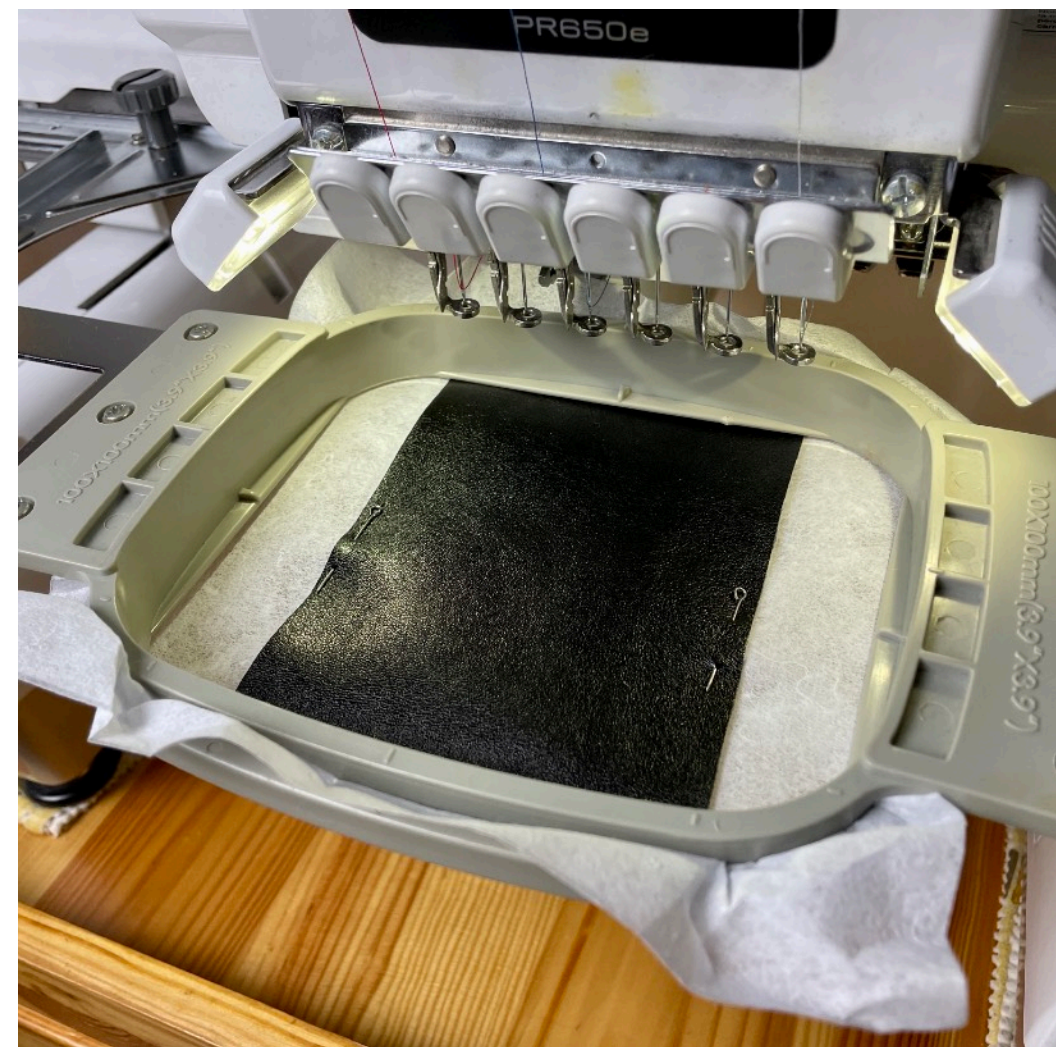

EMBROIDER DESIGN

We embroider the design to the beginning of the last element. Before embroidering this element, stop the embroidery machine.

OPEN THE PROGRAM IN THE EMBROIDERY MACHINE

EMBROIDER DESIGN

We embroider the design to the beginning of the last element.

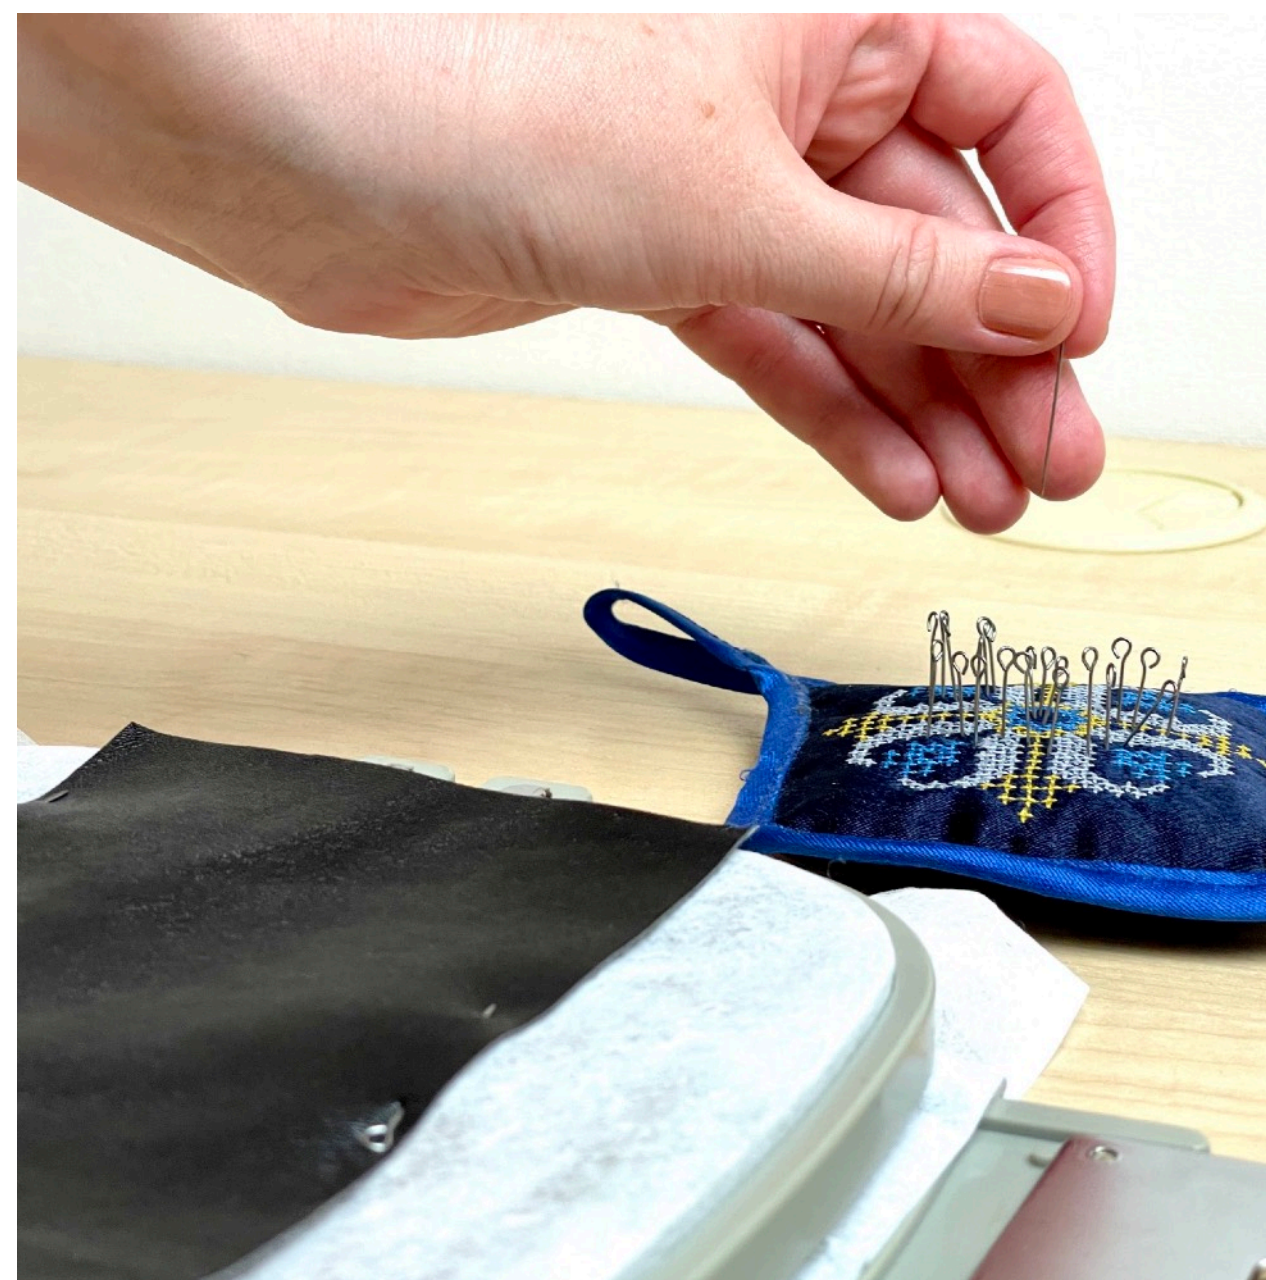

Before embroidering this element, stop the embroidery machine.

AFTER STOP

After pressing the "Stop" button on the embroidery machine:

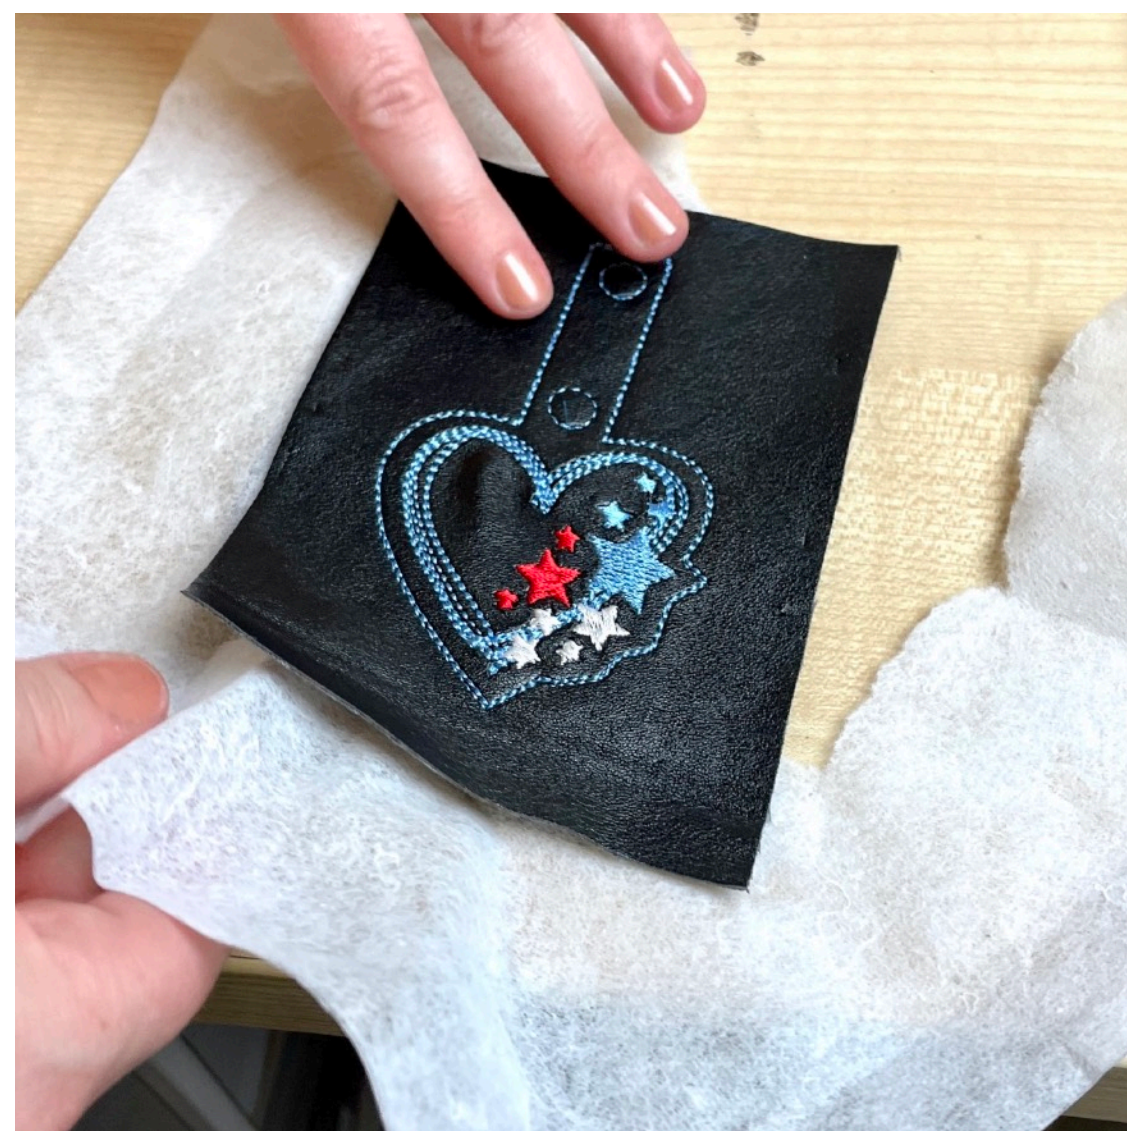

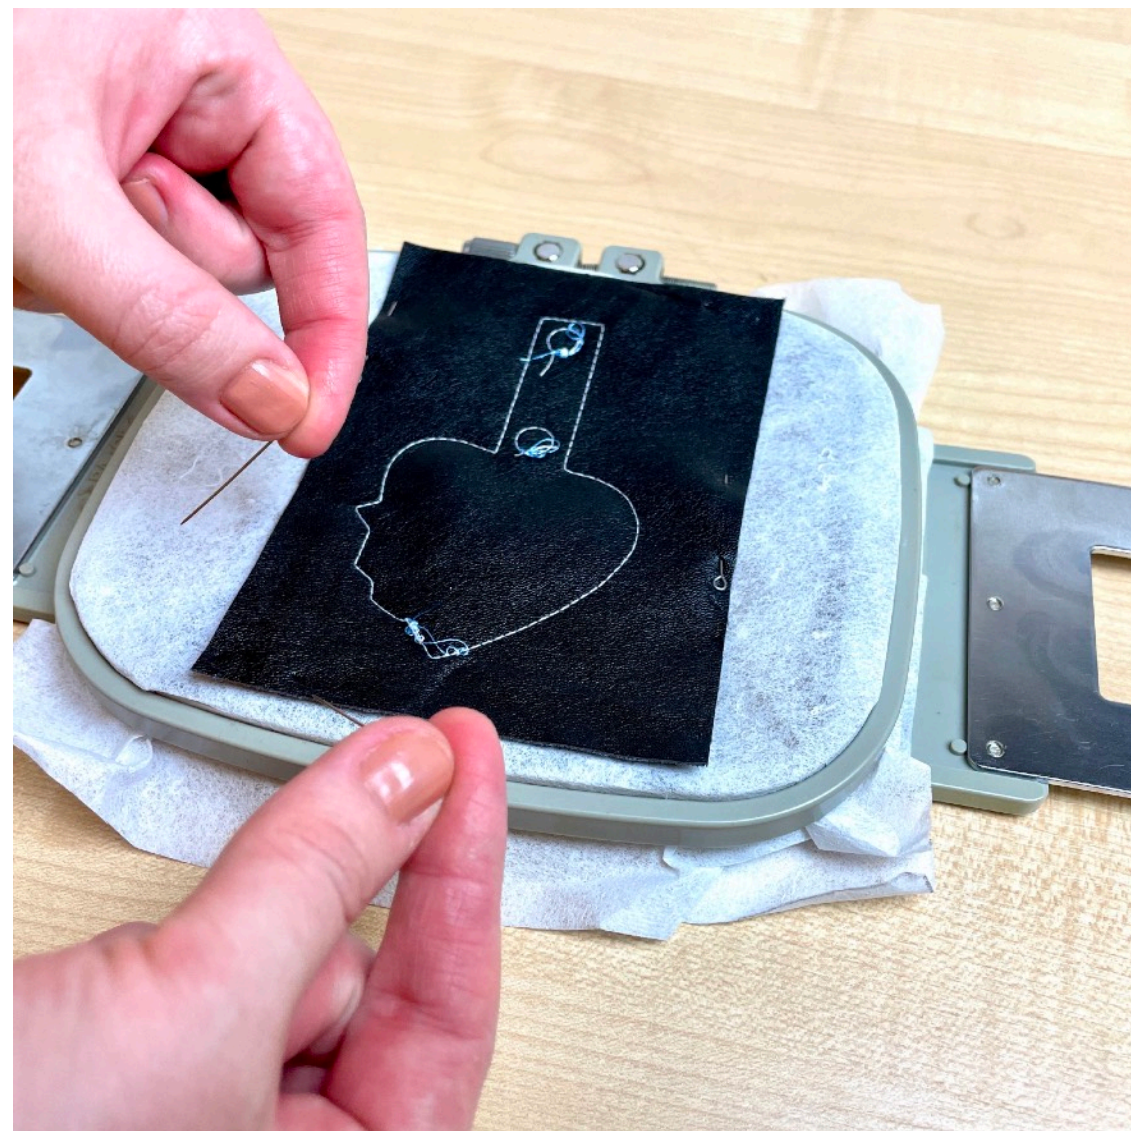

1. Carefully remove the hoops.
2. Turn inside out.
3. Attach the second piece of leather. Attach with pins or spray as shown in the photo.

FINISH EMBROIDERING

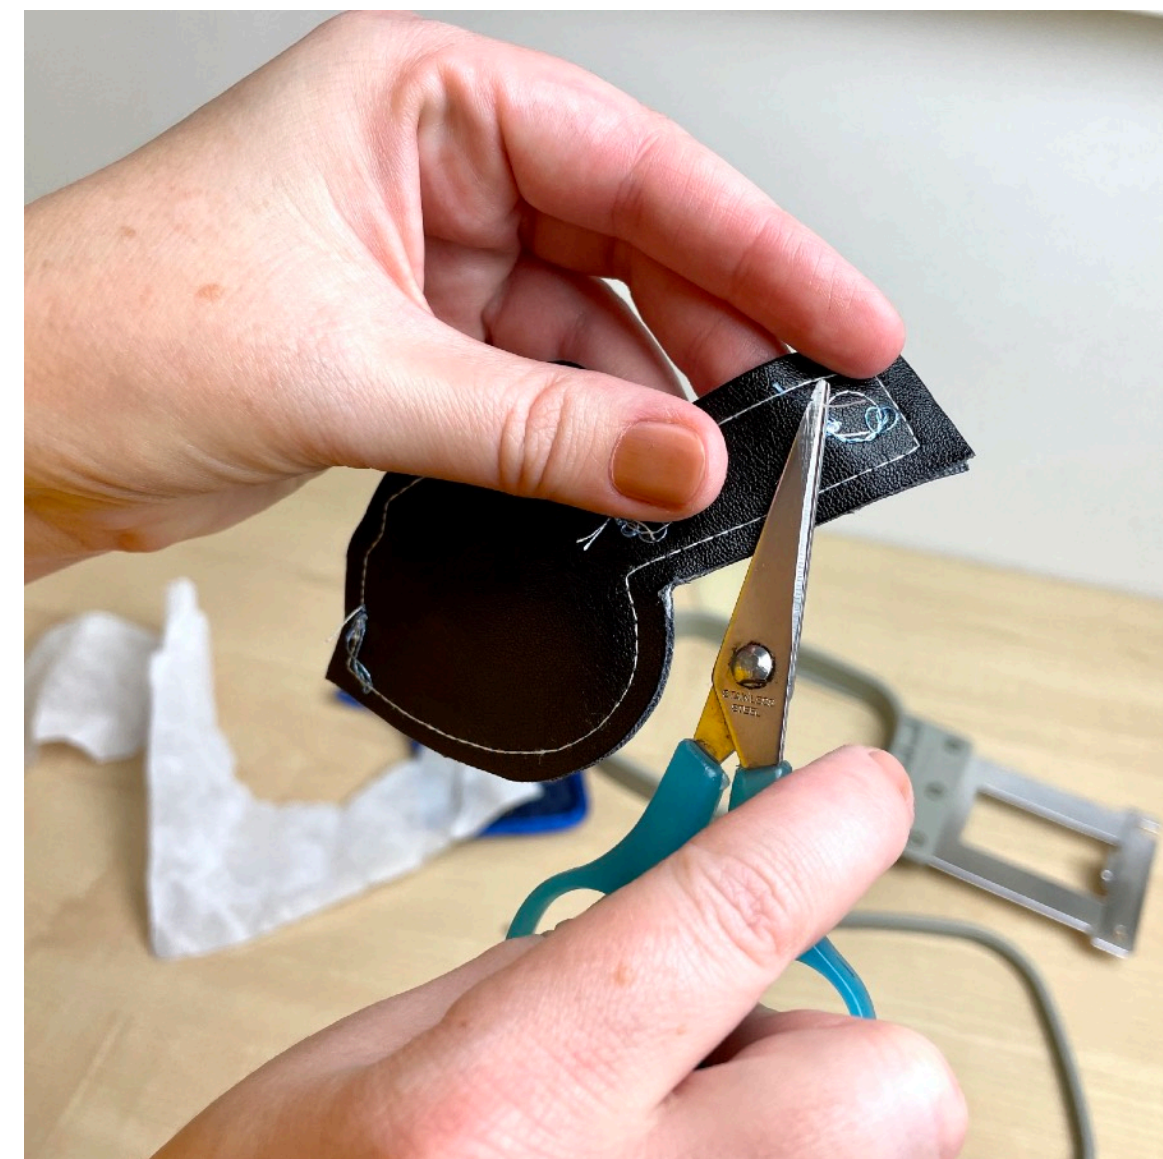

Finish embroidering all the elements and remove the embroidery from the embroidery machine.

Remove the pins, remove the remnants of the stabilizer

CONTOUR CUT

Carefully make a contour cut of the design. while retreating 0.2 inches from the line.

BUTTON OR BLOCK

The final stage of the product - insert a button or block. And then a ring or carbine. (How to insert the correct fittings is clearly seen in the photo below)
