cm. 30

WHAT IS NEEDED:

Padding 1 cm

Foam 1 cm

Felt or fabric of your choice

Tear-off stabilizer in the hoop - Embroider the position track

Place foam on top - I embroider the next track - I cut out the excess

Place on the batting - I embroider the next track - I cut out the excess

I put the outer fabric on top and fasten it with pins

I turn the frame over and place the lining

I embroider the next track - I cut the excess fabric both above and below

I finish with the last cover seam

I do the same for the other half of the circle

Also to be a child I carry out the first operations I did for the semicircles
In this case I don't put the second layer of padding
Then little by little I do all the applications in order as shown in the photos
Before putting on the lining, I embroider the face and the details of the pajamas
I put the lining on the wrong side of the frame, cut out the excess
and finish with the cover stitch

I perform the same procedure to make all the other elements that are in the project
Join all parts with hot glue or fabric glue
