6x10"  
8x12"

WHAT IS NEEDED:

Padding 1 cm

Foam 1 cm

Felt or fabric of your choice

I put tear-off stabilizer in the hoop - I embroider the position trace  
Place foam on top - I embroider the next track - I cut out the excess  
Place on the batting - I embroider the next track - I cut out the excess  
I embroider all the applications as shown in the photo - I turn the frame over and fix the lining  
Embroider the next track - Cut out the excess fabric  
I finish with the last cover seam

To make the hanger, I follow the same procedure by inserting the two layers of padding  
Instead, to make the bear and the decorations I just put foam  
Then I assemble all the parts using hot glue or fabric glue
