

ITH Swan – Machine embroidery

WHAT IS NEEDED:

Foam 1 cm
Padding 1 cm
Felt or fabric of your choice

STEP TO MAKE THE GARLAND

Place the tear-off stabilizer in the hoop - Embroider the position trace
Place down the foam - Embroider the next seam - Cut out the shape - Place the padding
over the foam, fix with pins - Embroider the following seam - Cut out the excess padding

Place the outer fabric on the shape - Turn the frame over and fix the lining on the back
Embroider the next trace and cut out the excess fabric both above and below - Finish with the
last seam - Repeat the procedure for the other half of the garland

Even to do the two wheels the procedure is the same. When you get to position the fabric over the padding, embroider the X-shaped seams then place a ribbon on top and secure it with adhesive tape on all four sides. - Embroider the flowers in the center - Then put the lining on and continue with the steps as you did for the previous parts

Turn the hoop over and fix the lining, put the hoop back into the machine, sew the next track
Cut out the excess fabric both above and below and finish with the last seam

Do the same procedure to make the cloud and the crown

Assemble all parts with fabric glue or hot glue.
