

Prim Pumpkin & Witch Coasters

S H Designs

sheryl@sherscreativespace.com

These coasters are done completely in the hoop. You will close the back using fusible seam tape.

Thank you for your purchase, and feel free to email me with any questions or comments. I also love to see pictures of the finished projects! sheryl@sherscreativespace.com

If you change the size or density of the original design, you could alter the final result.

SUPER IMPORTANT:

You will not remove the project from the hoop until you are completely finished with the stitching.

You will remove the hoop from the machine several times, but the fabric and stabilizer remain in the hoop.

PLEASE READ THESE IMPORTANT NOTES FIRST

- Jump stitches can be trimmed whenever you want. I like to trim them during stitching breaks, especially if they will be in the way of future stitching.
- Your placement stitches can be any color because they won't show. The thread for your final stitching should match the main fabric.
- If using tape, place it so you won't be stitching through it. It can gum up your needle and break the thread.
- All my coasters are made the same way, so the design on these images may not match your design, but the steps are exactly the same. Don't worry because I give you step by step instructions for the design you have chosen.
- I use fusible seam tape so that no stitching is needed. You can stitch if you prefer, or leave the bottom unfinished since it won't show anyway.

Supplies for each coaster:

- 6 x 6 inch fabric (main fabric)
- 4 1/2 x 4 1/2 inch fabric (center fabric)
- 6 x 8 inch fabric, 2 of them (backing)
- 6 x 6 inch piece of cotton batting
- Cutaway stabilizer
- Basting spray (much safer than pins)
- 4 inch piece of 1/2 inch wide fusible seam tape
- 6 x 6 inch piece of tearaway stabilizer or tissue paper
- Size 11 embroidery needle
- Embroidery thread
- General sewing and embroidery supplies

Small fabric scraps for appliques only if your coaster contains applique.

Note about batting:

100% cotton batting was used in the sample, but you could substitute a light color of felt, or sew-in fleece.

Note about stabilizers:

Use whatever you are comfortable with. I like the Sulky Cut Away.

As for the tear away stabilizer or tissue paper:

This will prevent the presser foot from getting caught on the folded fabric when stitching the back on (final stitching).

Instructions for making the coasters:

STEP 1:

- Hoop the cutaway stabilizer.
- Take the hoop to the machine and stitch out the first step, which is the placement stitches for your coaster. Remove hoop from machine.

STEP 2:

- Place the 6 x 6 inch piece of cotton batting over the placement stitches.
- Place the 6 x 6 inch piece of fabric over the cotton batting.
- I find that I get the best results when using spray adhesive (designed for embroidery) for this step. If you prefer to use pins, cut your fabric and batting bigger so that your pins will be far away from the stitching line.

STEP 3:

- Return the hoop to the machine and stitch the next step. This is simply a basting stitch that will keep the fabric and cotton batting secure. You can remove it later if it shows once the coasters have been turned right side out.

STEP 4:

- The next couple stitchings will be just like any applique project you would do. Immediately after your basting stitch, you will stitch the placement stitch for your center fabric. Then place the fabric over the placement stitch and stitch in place (your tackdown stitch). Be sure to leave a margin around the stitching line.

**STEP 5:**

- Remove hoop from machine and cut the excess fabric away from the stitching line. Cut as close to the stitching line as you can. Return hoop to the machine, and your next step is to stitch the stippling. This will give your decorative stitching a nice foundation to stitch on.

**STEP 6:**

- Now the fun starts! Begin your decorative stitching. The first stitch will be your satin stitch around the square, followed by the decorative stitching. Stop when you get to the last stitching step. Remove hoop from the machine and place on your work table.

**STEP 7:**

- Fold your 6 x 8 inch pieces of fabric in half and iron. Right sides will be facing out, and you will meet the short ends together. Place the folded fabrics over the design with the folds toward the center. Overlap one of the halves. This will leave a nice opening to turn right side out, and the overlap will be needed for final closing. Secure with tape at the top and the bottom.

STEP 8:

- Place your tissue paper or tearaway stabilizer over the halves and stitch your final stitching.
- The tissue paper or tearaway stabilizer is very important because this will prevent your needle from getting caught up with the folded fabrics. I tried without, and this was the best way to prevent that from happening.

STEP 9:

- Tear away the stabilizer or tissue paper, then remove project from hoop. Cut all the way around the coaster about 1/8 to 1/4 inch away from the stitching. Turn right side out through the opening. Push out corners and iron.
- Place your piece of fusible seam tape inside the overlap and iron in place.
