

ITH key fob/key chain

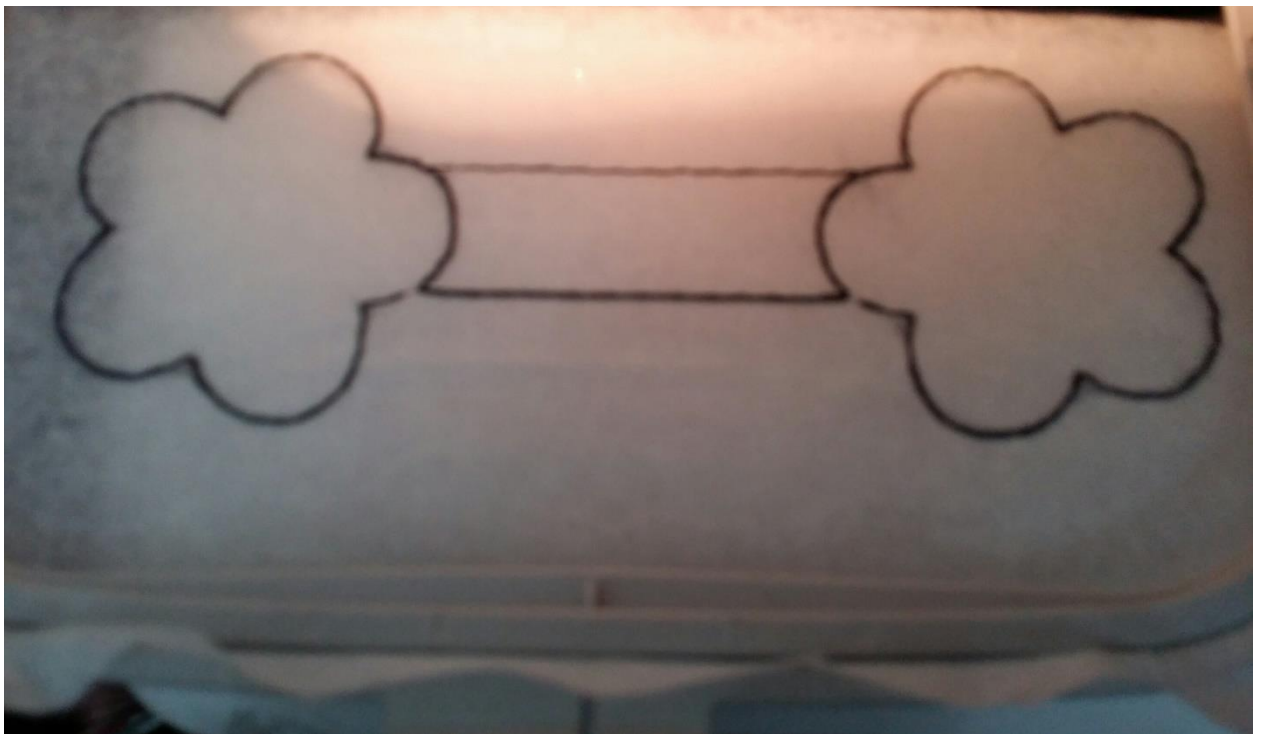

Things you will need:

1. Top fabric (small-4.5x4.5 inches square / Big- 6x6 inches square)
2. Fleece or felt or any light batting (same size as the top fabric)
3. Any kind of key ring.

Step 1-

Hoop a piece of tear away and stitch the 1st color.

(Use same color as your top fabric so you can change color for the 3rd stitch)

Step 2-

Place your top fabric covering the whole of the outline, you can tape it if you want or just hold it in place for some time. Stitch out the 2nd outline which will tack down your fabric.

Step 3

Change thread/threads to that of your design and complete the stitch out. (Except the last outline)

Step 4

Remove the hoop from the machine and place the fleece/felt/batting on the back side of the hoop covering the design well from all sides, tape it in place.

Step 5

Stitch out the last outline which will attach the 2 layers together. (Your tear away is sandwiched between the 2 layers)

Step 6

Unhoop and remove the excess stabilizer. Neatly cut around the whole design 1/8th inch away from the stitching. (Careful not to cut the outline stitches and maintain consistency so as to match both halves of the key chain)

Step 7-

Slide the key ring to the mid of the keychain, apply some glue on 1 half leaving some portion in the middle clean.

(You don't want to stick the key ring)

Stick the 2 halves together, let it dry and you can still trim a bit if any cutting is uneven.
