

Instructions

Thank you for purchasing my design!

You need:

- 2 pieces of. For the front and the back side you can use felt of different colors.
- embroidery threads
- pins or temporary adhesive spray
- scissors
- tear-off stabilizer
- thin ribbon approximately 50 cm long

Getting started!

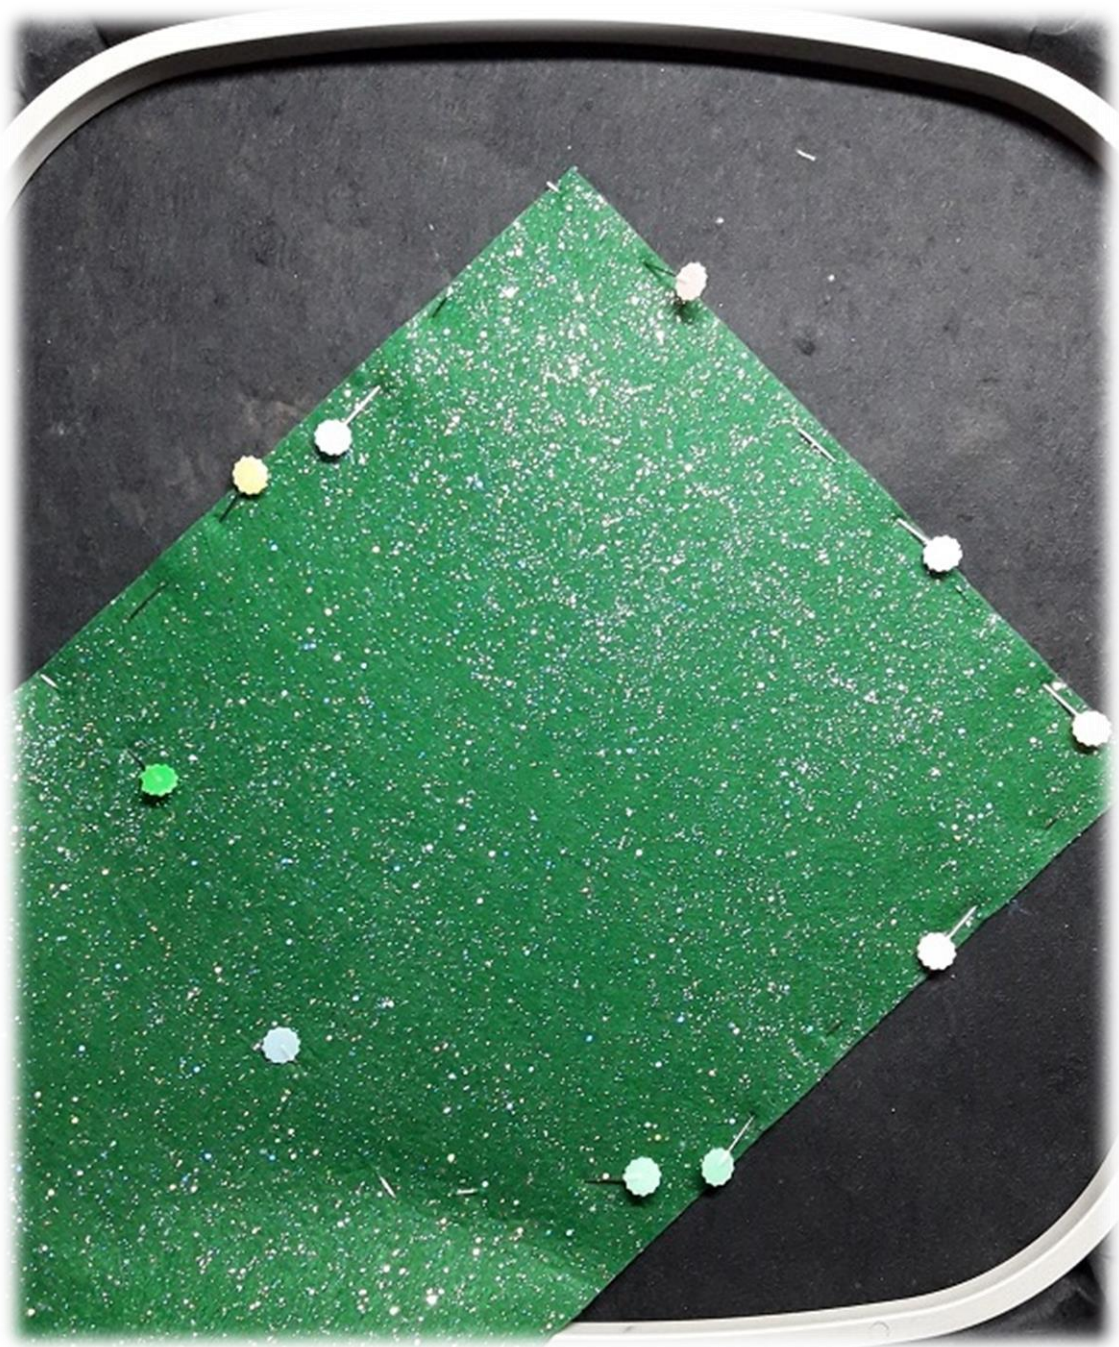

1. Put the tear-off stabilizer in the hoop

2. Put the hoop in the machine and embroider the first color.
This line shows the place of embroidery.

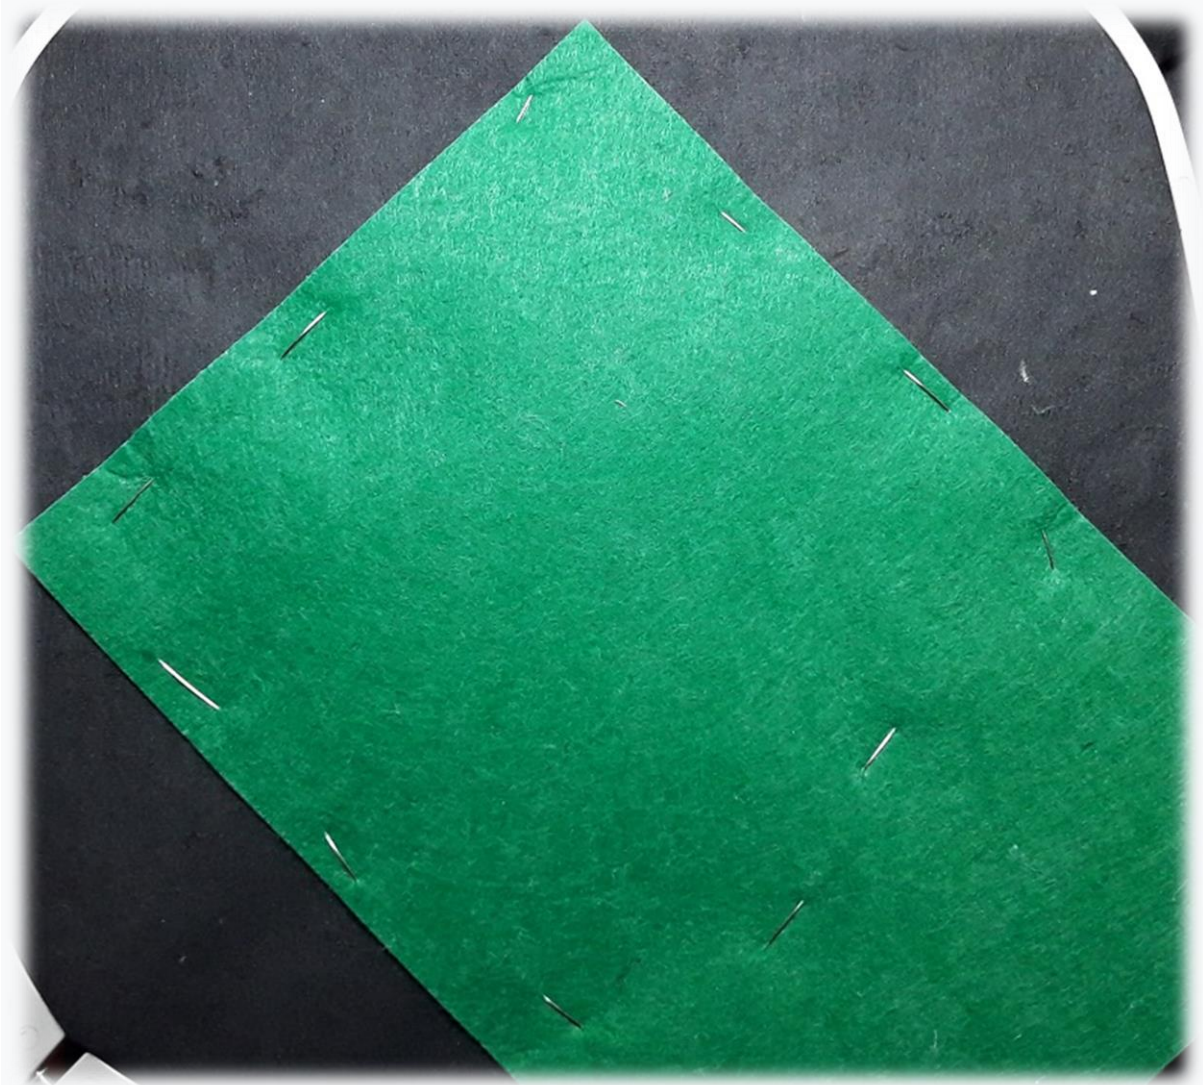

3. Put 1 piece of felt over the basting stitch, leaving at least 0.2 inches of allowance. Pin it around the perimeter with pins or use temporary adhesive spray. Be careful! The pins must not get caught under the needle. Otherwise, your embroidery machine may be damaged.

4. Embroider the color 2 (box outline) and color 3.

5. Turn the hoop to the back side. Put second piece of felt over the basting stitch, leaving at least 0.2 inches of allowance. Pin it around the perimeter with pins (on the front side) or use temporary adhesive spray.

Now you need to change the bobbin thread to the same color as the upper thread.

6. Put the hoop in the machine and embroider last color (contour of the box and 4 holes).

7. Remove the hoop from the machine and take out the embroidery from the hoop. Remove excess stabilizer.

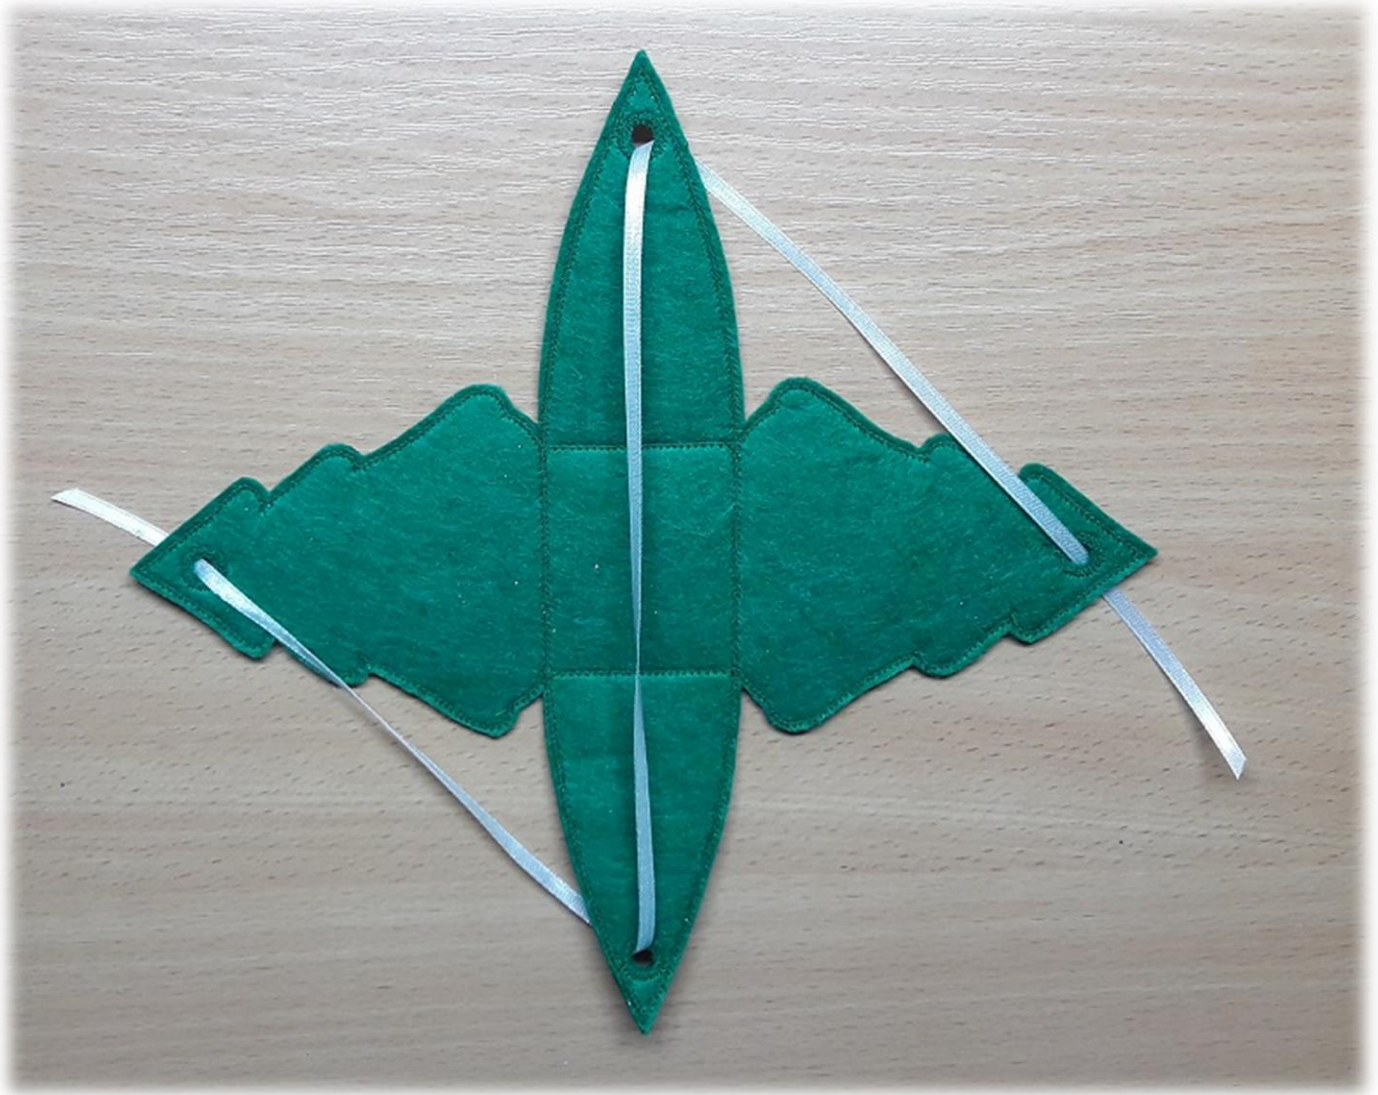

8. Take scissors and cut out the bag. Step back 1-1.5mm from the seam.

Now you need to carefully cut the holes for the ribbon. First, cut holes on the front side, then on the back side. Remove excess stabilizer from holes. Remove all remaining thread.

It remains to tie a ribbon, put in a present and give it to someone.

That's all! Now you can make a little pretty surprise for all family and friends!

Enjoy the result of your work!
