Hoop Stabilizer

Stitch 1: Placement line. This will stitch an outline of the project.

Place 4x3 inch piece of fabric over the placement line. You may want to use a spray adhesive made machine embroidery to help hold the fabric in place.

Stitch 2: Tack down stitch. This will hold the fabric in place.

Stitch 3: This stitch will embroider the design elements such as the pom pom, hat fur, eyes or candy stripes.

Stitch 4: This stitch will continue the remaining design elements.

Float a 4x3 piece of fabric underneath the hoop. This will be the back side of the project.

Stitch 5: This will join the two pieces of fabric together. The final stitch will leave an opening for stuffing.

Trim excess fabric and stuff the project. Use an invisible hand stitch to close the opening.
